hypothetical protein MTH108 - Methanobacterium thermoautotrophicum (strain Delta H)
Cypothecical protein MTH108 - Methanobacterium thermoautotrophicum
Cypothecies: Methanobacterium thermoautotrophicum
Cybate: O5-Dec-1997 #sequence_revision O5-Dec-1997 #text_change O9-Jul-2004
C;Accession: D69010
R;Smith, D.R.; Doucette-Stamm, L.A.; Deloughery, C.; Lee, H.; Dubois, J.; Aldredge, T.;
S;Church, G.M.; Daniels, C.J.; Mao, J.; Rice, P.; Noelling, J.; Reeve, J.N.
J. Bacteriol. 19, 7135-7155, 1997
A;Title: Complete genome sequence of Methanobacterium thermoautotrophicum Delta H: fun:
A;Reference number: A69000; MUID:98037514; PMID:9371463
A;Accession: B69010
A;Status: preliminary; nucleic acid sequence not shown; translation not shown
A;Molecule type: DNA
A;Residues: 1-77 <MTH>
A;Residues: 1-77 <MTH>

Apporthetical protein STY4564 (imported) - Salmonella enterica subsp. enterica serovar Tryphi
C;Species: Salmonella enterica subsp. enterica serovar Tryphi
A;Note: this species has also been called Salmonella tryphi
C;Cate: 09-Nov-2001 #sequence_revision 09-Nov-2001 #text_change 18-Nov-2002
C;Accession: AC1030
A;Authors: Parry, C; Quail, M.; Rutherford, K.; Simmonds, M.; Skelton, J.; Stevens, K.

FUNCTION: Potent inhibitor of fibrinogen interaction with platelet receptors expressed on glycoprotein IIb-IIIa complex. May prevent blood from clotting during either feeding and/or storage of ingested blood.
SUBCELLULAR LOCATION: Secreted.
SIMILARITY: Belongs to the ornatin family.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           suppressing plant polypeptide.";

Eur. J. Blochem. 264:525-533(1999).

-!-FUNCTION: Suppresses strongly the sweet taste responses in the rat with high specificity to sucrose, glucose, glycine, and saccharin.

This effect is reversible, but complete recovery of the suppressed responses required at least 3h. Gurmarin showed no effect or only a very weak effect on the sweet taste sensation in humans.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           STRUCTURE BY NMR.
